

**Today:  
Decision by  
the people**

**Tomorrow:  
Dictatorship  
by WHO**

The deadlines  
have been  
**shortened.** We  
must **act now!**

The deadlines have  
been shortened.  
We have to take action!

**The following deadlines have been set/shortened since our last dispatch:**

- **Pandemic Treaty:** 18-month **domestic ratification period** from May 2024; In Switzerland, this is unlikely to be sufficient for a popular referendum.
- **IHR:** declaration of rejection by the government **by the end of March 2025 at the latest**; This completely excludes the people's right to have a say in Switzerland. The deadline can only be met through pressure from parliament on the government. If this fails, the IGV comes into force.

Non-partisan committee of the canton of Graubünden to protect the self-determination and sovereignty of Switzerland

**Souverän GR** | Postfach 33 | 7031 Laax

**The following innovations remain unchanged in both drafts:**

- The previous recommendation character of WHO instructions will be converted into a binding command character.
- This without any examination of the WHO's shortcomings that have been identified since 2020
- Destruction of the doctor-patient relationship through the new WHO command
- The international health regulations (IHR) in their planned version are much more threatening than the pandemic pact in its current draft stage.
- This cuts off national jurisdiction and judicial powers.
- In Switzerland, the new IHR effectively means a **total revision of the Federal Constitution**, as the constitutional principles of separation of powers, national sovereignty, the principle of proportionality and the prohibition of arbitrariness in accordance with Articles 5 and 9 of the Federal Constitution are eliminated. The deadlines for a total revision of the Federal Constitution **are not sufficient**.
- The WHO, in the person of its Director General, claims **sole and all-encompassing authority** on issues of alleged medical threats to humans, animals, plants and even the "climate".
